

M/s Centrodorstroy India Pvt Ltd (Phillaur Nagar Rahon)

Inspection of identified four locations for setting up the construction camp was made jointly with Mr. Davendrapal Singh (SDO, Ludhiana) and representative of M/s Centrodorstroy India Pvt. Ltd. After the inspection the location probably between km 20.000 and km 20.300 was found to be complying with the requirements of the EMP. Some of the points that need to be kept in mind during camp set up are:

- i. The location being in the vicinity of agriculture land, it is required to ensure that safeguard measures against contamination of soil, waste water disposal from camp, solid waste disposal, etc are taken up during planning stage.
- ii. It was advised that the detail plant and camp layout be submitted and got finalized prior to constructing the camps and other facilities. It was also informed to prepare a detail rehabilitation plan and gets approved.
- iii. It was advised to check out with local people/bodies for disposal site and get approved from this office.
- iv. The approach road is narrow and this needs strengthening prior to start of the construction work and rehabilitation plan of road after ending of project is also need to be submitted.
- v. It was advised to get identified location check by PPCB official and gets the NOC for setting of plant as soon as possible, in order to prevent any kind of delay.
- vi. It was advised to consult with the local people with details of plants going to set up in the area, so as to prevent any kind of dispute in near future.
- vii. Contractor was informed of setting information kiosk with details of project for public suggestion and comments.

Additional environment safeguard measures shall be incorporated during planning and subsequent stages of construction after submission of detail plant and camp layout plan.
