

## Screening Report

The screening identifies and assesses the probable impacts on different social issues due to the proposed development. After studying the existing Right of Way (RoW) and proposed Corridor of Impact (CoI), the screening exercise has been done by PRBDB with PWD (B&R) division Sangrur all over the proposed improvement as listed below. The structures have been measured at certain locations wherever required. After screening no direct impact has been identified. At certain locations of the proposed improvement, temporary impact on access to house/shop/Agriculture land/ CPRs may occur during construction and post construction phase. These temporary impacts will be addressed and mitigated by the contractor during construction and post construction phase by providing common access and ramp/stairs respectively wherever required. The provision of the same has been included in the Bid document. The screening was done for the below proposed improvement:

| SL. No.                           | Road Name                             | Length | Type of Intervention |
|-----------------------------------|---------------------------------------|--------|----------------------|
| <b>Additional Roads</b>           |                                       |        |                      |
| 1                                 | Sunam-Lehergaga                       | 37.80  | Rehabilitation       |
| 2                                 | Khanna-Malerkotla                     | 14.690 | Rehabilitation       |
| 3                                 | Derebassi-Mubarakpur-Ramgarh          | 7.20   | Rehabilitation       |
| 4                                 | Derabassi-Barwala                     | 7.20   | Rehabilitation       |
| <b>Diversion for RoB (OPRC)</b>   |                                       |        |                      |
| 5                                 | Diversion for RoB on S2 road          | 10.82  | Rehabilitation       |
| <b>Widening of bridges (OPRC)</b> |                                       |        |                      |
| 6                                 | Small Bridge on S1 road at RD 10.200  | -      | Widening of bridge   |
| 7                                 | Small Bridge on B8 road at RD 20.600  | -      |                      |
| 8                                 | Small Bridge on S2 road at RD 54.040  | -      |                      |
| 9                                 | Small Bridge on S2 road at RD 69.800  | -      |                      |
| 10                                | Small Bridge on S2 road at RD 73.450  | -      |                      |
| 11                                | Small Bridge on S2 road at RD 100.800 | -      |                      |
| 12                                | Small Bridge on S2 road at RD 53.500  | -      |                      |

The Screening report for the above proposed improvements is enclosed for reference.
